Wilbarger County Elections Update

The first two days of Early voting, Wilbarger County had 891 ballots cast in the General Election.

In one reported instance, a voter reviewed their choices on the proof screen and found it did not correctly reflect her choice for President. The voter was assisted in backing out of the proof screen and then she corrected her choice for President. She proceeded to print her ballot and all marks were to her satisfaction. She proceeded to place her ballot in the scanner and her vote was then casted as she intended.

Wilbarger County's voting system gives a person a choice to vote via marking a ballot by hand or via electronic ballot. The machine used for electronic voting offers a proof screen for your review before printing and then prints a final paper ballot for review before the ballot is cast. Wilbarger County election officials who oversee elections encourage voters to confirm their selections on the physical paper ballot before placing it in the scanner to be counted.

Wilbarger County Officials has every confidence in its current voting system and has no reason to believe that votes are being switched or altered.
